

Chapter 4 Syntax Analysis

Computing First(X) : All Grammar Symbols

1. If X is a terminal, $\text{First}(X) = \{X\}$
2. If $X \rightarrow \epsilon$ is a production rule, add ϵ to $\text{First}(X)$
3. If X is a non-terminal, and $X \rightarrow Y_1 Y_2 \dots Y_k$ is a production rule

Place $\text{First}(Y_1)$ in $\text{First}(X)$

if $Y_1 \Rightarrow^* \epsilon$, Place $\text{First}(Y_2)$ in $\text{First}(X)$

if $Y_2 \Rightarrow^* \epsilon$, Place $\text{First}(Y_3)$ in $\text{First}(X)$

...

if $Y_{k-1} \Rightarrow^* \epsilon$, Place $\text{First}(Y_k)$ in $\text{First}(X)$

NOTE: As soon as $Y_i \Rightarrow^* \epsilon$, /Stop.

Repeat above steps until no more elements are added to any $\text{First}()$ set.

Checking " $Y_j \Rightarrow^* \epsilon$?" essentially amounts to checking whether ϵ belongs to $\text{First}(Y_j)$

Example 1

Given the production rules:

$$S \rightarrow aABb$$

$$A \rightarrow c \mid \epsilon$$

$$B \rightarrow d \mid \epsilon$$

Verify that

$$\text{First}(S) = \{a\}$$

$$\text{First}(A) = \{c, \epsilon\}$$

$$\text{First}(B) = \{d, \epsilon\}$$

3

Computing First(X) : All Grammar Symbols - continued

Informally, suppose we want to compute

$$\text{First}(X_1 X_2 \dots X_n) = \text{First}(X_1) \text{ "+"}$$

$$\text{First}(X_2) \text{ if } \epsilon \text{ is in } \text{First}(X_1) \text{ "+"}$$

$$\text{First}(X_3) \text{ if } \epsilon \text{ is in } \text{First}(X_2) \text{ "+"}$$

...

$$\text{First}(X_n) \text{ if } \epsilon \text{ is in } \text{First}(X_{n-1})$$

Note 1: Only add ϵ to $\text{First}(X_1 X_2 \dots X_n)$ if ϵ is in $\text{First}(X_i)$ for all i

Note 2: For $\text{First}(X_1)$, if $X_1 \rightarrow Z_1 Z_2 \dots Z_m$, then we need to compute $\text{First}(Z_1 Z_2 \dots Z_m)$!

4

Example 2

Given the production rules:

$$S \rightarrow i E t S S' \mid a$$

$$S' \rightarrow e S \mid \epsilon$$

$$E \rightarrow b$$

Verify that

$$\text{First}(S) = \{ i, a \}$$

$$\text{First}(S') = \{ e, \epsilon \}$$

$$\text{First}(E) = \{ b \}$$

5

Example - 3

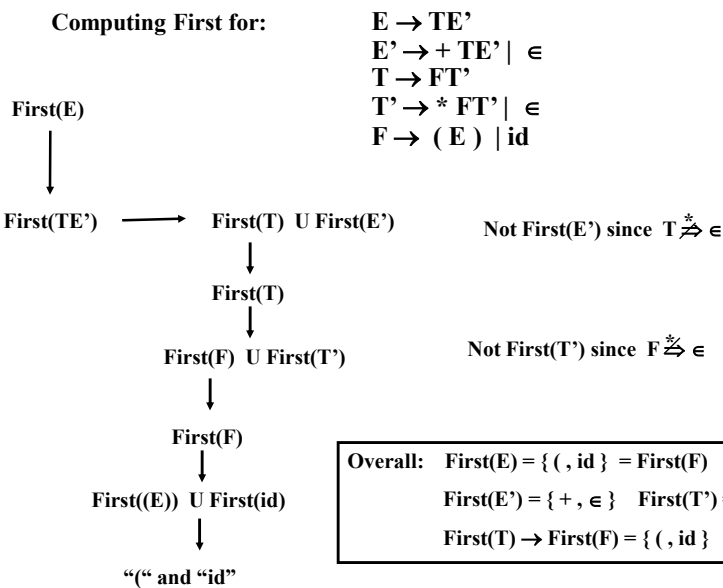

1. $S \rightarrow A a$
2. $A \rightarrow B D$
3. $B \rightarrow b$
4. $B \rightarrow \epsilon$
5. $D \rightarrow d$
6. $D \rightarrow \epsilon$

Example - 3

1. $S \rightarrow A a$
2. $A \rightarrow B D$
3. $B \rightarrow b$
4. $B \rightarrow \epsilon$
5. $D \rightarrow d$
6. $D \rightarrow \epsilon$

$\text{First}(S) = \{b, d, a\}$
 $\text{First}(A) = \{b, d, \epsilon\}$
 $\text{First}(B) = \{b, \epsilon\}$
 $\text{First}(D) = \{d, \epsilon\}$

Example 4

Example - 5

$$S \rightarrow ABC \mid CbB \mid Ba$$

$$A \rightarrow da \mid BC$$

$$B \rightarrow g \mid \epsilon$$

$$C \rightarrow h \mid \epsilon$$

$$\text{First}(B) = \{g, \epsilon\}$$

$$\text{First}(C) = \{h, \epsilon\}$$

Example - 5

$$S \rightarrow ABC \mid CbB \mid Ba$$

$$A \rightarrow da \mid BC$$

$$B \rightarrow g \mid \epsilon$$

$$C \rightarrow h \mid \epsilon$$

$$\begin{aligned} \text{First}(A) &\rightarrow \text{First}(da) \cup \text{First}(BC) \\ &\rightarrow \{d\} \cup \text{First}(B) - \{\epsilon\} \cup \text{First}(C) \\ &\rightarrow \{d\} \cup \{g, \epsilon\} - \{\epsilon\} \cup \{h, \epsilon\} \\ &\rightarrow \{d, g, h, \epsilon\} \end{aligned}$$

$$\text{First}(B) = \{g, \epsilon\}$$

$$\text{First}(C) = \{h, \epsilon\}$$

Example - 5

$S \rightarrow ABC \mid CbB \mid Ba$

$A \rightarrow da \mid BC$

$B \rightarrow g \mid \epsilon$

$C \rightarrow h \mid \epsilon$

$\text{First}(S) \rightarrow \text{First}(ABC) \cup \text{First}(CbB) \cup \text{First}(Ba)$

$\rightarrow \{d, g, h, \epsilon\} \cup \{h, b\} \cup \{g, a\}$

$\rightarrow \{a, b, d, g, h, \epsilon\}$

$\text{First}(ABC) \rightarrow \text{First}(A) - \{\epsilon\} \cup \text{First}(B) - \{\epsilon\} \cup \text{First}(C)$

$\rightarrow \{d, g, h\} \cup \{g\} \cup \{h, \epsilon\}$

$\rightarrow \{d, g, h, \epsilon\}$

$\text{First}(CbB) \rightarrow \text{First}(C) \cup \text{First}(bB)$

$\rightarrow \{h, \epsilon\} - \{\epsilon\} \cup \{b\}$

$\rightarrow \{h, b\}$

$\text{First}(Ba) \rightarrow \text{First}(B) \cup \text{First}(a)$

$\rightarrow \{g, \epsilon\} - \{\epsilon\} \cup \{a\}$

$\rightarrow \{g, a\}$

$\text{First}(A) \rightarrow \text{First}(da) \cup \text{First}(BC)$

$\rightarrow \{d\} \cup \text{First}(B) - \{\epsilon\} \cup \text{First}(C)$

$\rightarrow \{d\} \cup \{g, \epsilon\} - \{\epsilon\} \cup \{h, \epsilon\}$

$\rightarrow \{d, g, h, \epsilon\}$

$\text{First}(B) = \{g, \epsilon\}$

$\text{First}(C) = \{h, \epsilon\}$

Example - 6

$E \rightarrow TX$

$X \rightarrow + E$

$X \rightarrow \epsilon$

$T \rightarrow \text{int } Y$

$T \rightarrow (E)$

$Y \rightarrow * T$

$Y \rightarrow \epsilon$

The **First** of a terminal is that terminal.

Symbol	First
((

*	*
int	int
Y	$\epsilon, *$
X	$\epsilon, +$
T	int, (
E	int, (

Example 6

1. $C \rightarrow P F \text{ class id } X Y$
2. $P \rightarrow \text{public}$
3. $P \rightarrow \epsilon$
4. $F \rightarrow \text{final}$
5. $F \rightarrow \epsilon$
6. $X \rightarrow \text{extends id}$
7. $X \rightarrow \epsilon$
8. $Y \rightarrow \text{implements I}$
9. $Y \rightarrow \epsilon$
10. $I \rightarrow \text{id J}$
11. $J \rightarrow , I$
12. $J \rightarrow \epsilon$

Example - 6

- | | |
|--|--|
| 1. $C \rightarrow P F \text{ class id } X Y$ | |
| 2. $P \rightarrow \text{public}$ | |
| 3. $P \rightarrow \epsilon$ | |
| 4. $F \rightarrow \text{final}$ | $\text{First}(C) = \{\text{public, final, class}\}$ |
| 5. $F \rightarrow \epsilon$ | $\text{First}(P) = \{\text{public, } \epsilon\}$ |
| 6. $X \rightarrow \text{extends id}$ | $\text{First}(F) = \{\text{final, } \epsilon\}$ |
| 7. $X \rightarrow \epsilon$ | $\text{First}(X) = \{\text{extends, } \epsilon\}$ |
| 8. $Y \rightarrow \text{implements I}$ | $\text{First}(Y) = \{\text{implements, } \epsilon\}$ |
| 9. $Y \rightarrow \epsilon$ | $\text{First}(I) = \{\text{id}\}$ |
| 10. $I \rightarrow \text{id J}$ | $\text{First}(J) = \{', \epsilon\}$ |
| 11. $J \rightarrow , I$ | |
| 12. $J \rightarrow \epsilon$ | |
