Deep learning: Multiple layers with well defined role.

## (I) CNN: Convolutional Neural Network

## Recurrent Neural Network (RNN)

Ram eats an apple "

Toput layer: APPLE 12345

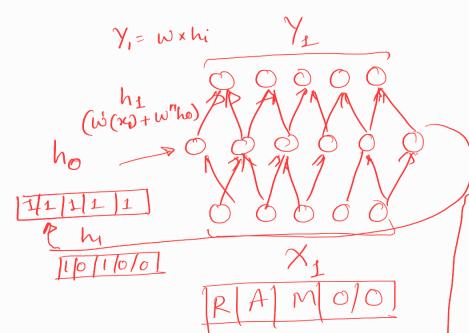

Padding

RAMOO

12345

Output layer: No of POS Categories

NN, NP, VB, ADV, ADJ

X2 Telalt Islo

 $\gamma_n = f(x_n, h_{n-1})$ 

Yn=f(xn)

- POS

- Speech to Text
- Machine Translation
- Language Generation (Fill the missing word, predict the next work)

Pretrained Models: Transformer

Libraries

- Tensorflow

BERT

Pytorch

Hugging Facel
